PLC & SCADA AUTOMATION

At EATECH, we offer robust and intelligent **PLC & SCADA Automation** solutions that empower industries to operate with precision, control, and efficiency. Our automation systems are designed to streamline complex industrial processes, reduce manual intervention, and ensure consistent productivity across various sectors such as manufacturing, power generation, water treatment, oil & gas, and more.

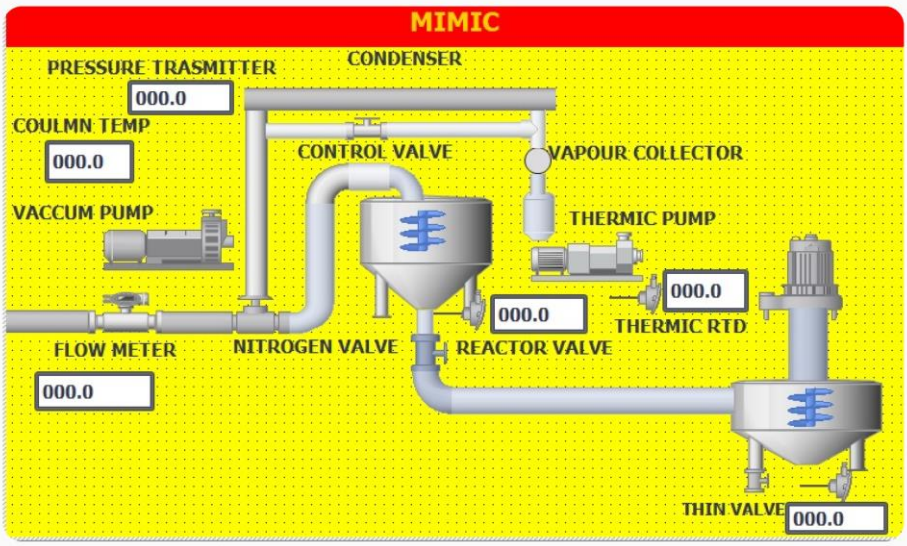
TECHNOLOGY FOR AUTOMATION & ENGINEERING



PLC

Water supply systems utilize programmable logic controllers(PLC) to enhance efficiency and automation. PLCs manage various components of the water supply process.

Complementing PLCs, our Supervisory Control and Data Acquisition **(SCADA) systems** offer powerful visualization, real-time monitoring, data logging, and alarm management capabilities. SCADA enables operators to make informed decisions with a complete overview of plant operations, from a single interface—locally or remotely. Our **SCADA solutions** support advanced analytics, predictive maintenance, and centralized control, which translates into reduced downtime and optimized resource utilization.

PIG RECEIVER
SCADA
Water supply systems leverage SCADA for advanced monitoring and control. SCADA technology enables centralized supervision of the entire water distribution network.
